Bredex awards grant to student at University of Applied Sciences

Bredex GmbH will present its yearly award to a student at the University of Applied Sciences in Braunschweig-Wolfenbüttel on the 15th September as part of the induction for new students. The winner of this year's prize is Juliane Wenzel, a student entering her third semester of her Bachelor's degree in Information Studies. The award, a grant of € 3000 will be presented by Achim Lörke, Managing Director of Bredex GmbH.

This marks the fourth year that Bredex GmbH has awarded a prize to a student at the University of Applied Sciences in Braunschweig-Wolfenbüttel. The grant is presented to students who have shown particular promise in their achievements at the University. This year, Juliane Wenzel was chosen because of her accomplishments in her studies and her involvement in the University:

"This award means a lot to me" said Julian Wenzel. "On the one hand, it represents financial support which means that I can concentrate on my studies without worrying about money. On the other hand it is a confirmation of my achievements. I am pleased that the efforts I have made have been rewarded."

Since the changeover from Diplomas to Bachelors and Masters degrees, the award has been presented to students in their first year of studies instead of in their pre-diploma phase. The aim, however, is the same: "We want to encourage and reward students as early as possible" explained Achim Lörke. "In this way, we can look forward to and rely on the next generation of software developers".

BREDEX GmbH

Since 1987, BREDEX GmbH has been providing high quality information technology services in the areas of consultancy, analysis and design, software development, quality assurance and training. Based in Braunschweig, the company has a history of long term

customer satisfaction and a focus on forward thinking, developing individual solutions that bring future standards to current project needs. BREDEX sells *GUIDancer*, which is a powerful and cost effective automatic test tool for Java and HTML applications.
