## Bredex GmbH at EclipseCon

Representatives from Bredex GmbH will be travelling to EclipseCon in Santa Clara (23<sup>rd</sup> - 26<sup>th</sup> March) to give two talks on their work with Eclipse. Achim Lörke will present an approach to using models to ease the start-up of GUI testing (Wed. 16.30, room 203/204), and Alexandra Imrie will be talking about usability in Eclipse applications (Tues. 10.35, Great America Ballroom). Achim and Alex will also be available in the exhibition hall on stand 204 to demonstrate the upcoming version 3.0 of *GUIDancer*, which is a finalist in the Eclipse Community Awards in the category for "Best Commercial Eclipse-based Developer Tool". Together with Christine Mitterbauer from MicroDoc they are organising the discussion group (BOF) about agile functional testing (Tues. 20.45, room 203/204).

"EclipseCon is always a great opportunity to come together and find out what's happening in the Eclipse community" said Achim Lörke, Managing Director at Bredex. "Alongside the interesting talks and the well-organized evening events, there is the chance to talk to people in the exhibition about the products and projects within Eclipse."

This will be the third year at EclipseCon for Bredex. Mike Milinkovich, Executive Director of the Eclipse Foundation, said about Bredex's participation: "it is good to see that Bredex will be at EclipseCon again; not just as sponsors, but also presenting talks about their work with Eclipse".

Bredex has been using and working with Eclipse in software projects for many years. Since 2007, the company has also been a solution member within the Eclipse Foundation. Bredex's automatic test tool, *GUIDancer*, is an Eclipse-based solution for Java and HTML test automation. Based on keyword-driven testing, it allows testers to create modular, robust tests from the outset, before an application is even available. *GUIDancer* has been nominated as a finalist for the 2009 Eclipse Community Awards, in the "Best Commercial Eclipse-based Developer Tool" category.

## **BREDEX GmbH**

Since 1987, BREDEX GmbH has been providing high quality information technology services in the areas of consultancy, analysis and design, software development, quality assurance and training. Based in Braunschweig, the company has a history of long term customer satisfaction and a focus on forward thinking, developing individual solutions that bring future standards to current project needs. BREDEX sells *GUIDancer*, which is a powerful and cost effective automatic test tool for Java and HTML applications.
